

PANIMPEX BLONDELLE INDUSTRY 2022

Ø 60 Gauge, Aluminium, Dry

Construction features

- Connection: vertical or rear, brass
- Light alloy case, hammered gray epoxy coating
- Glass in Polymetacrylate
- Glass fastening: by polished stainless steel hood
- Manometric element:
 - material: tombac
 - assembly: tin solder
- Zeroing screw accessible from the outside
- Brass amplifier mechanism

Threads

- M10x100 - M15x150 - M20x150
- 1/4 GAS co.
- 1/8 GAS cyl. 1/4 GAS cyl. - 3/8 GAS cyl. - 1/2 GAS cyl.
- 1/8 BRIGGS co. - 1/4 BRIGGS co. - 1/2 BRIGGS co.
- 1/4 SAE
- Other threads: contact us

Fixings

- By removable front collar (through mounting)
- By mounting bracket (surface mounting)

Accessories

- Nut, socket & seal
- Anti-choc protection (gray, blue, red), with or without hook
- Plastic storage case, with protective foam

Services

- Calibration or re-calibration with 6 point certificate, Retractable to a COFRAC or BELAC attached national standard.
- Repair Services

Technical specifications

- Accuracy: $\pm 1\%$ end of scale: Class 1
- Operating temperature: $-40 + 70^{\circ}\text{C}$
- Accidental pressure
 - 200% for scales below 50 bar
 - 150% for scales between 50 and 100 bar
 - 125% for scales over 100 bar
- Range of the scale: 300°
- List of available dials: see attached table

Options

- Silver brazing assembly (for temperatures above 70°C)
- Absolute Calibration
- Oxygen version
- Vacuum drying of the manometric element
- Filling of the manometer element with buffer fluid: glycerin
- Overload vent
- Max indicator system by follower needle
- Index needle
- Serialnumber printed on the dial
- Custom dial at the customer's request

Vertical Connection

PANIMPEX

Measurement Solutions 14

Ø 100 Gauge, Aluminium, Low Pressure, Tight

Construction features

- Connection: vertical or rear, brass
- Light alloy case, hammered gray epoxy coating
- Glass Polymetacrylate
- Glass fixation: by collar
- Manometric element:
 - material: beryllium bronze
 - assembly: tin solder
- Zeroing screw accessible from the outside
- Brass amplifier mechanism

Threads

- M10x100 - M15x150 - M20x150
- 1/4 GAS co.
- 1/8 GAS cyl. 1/4 GAS cyl. - 3/8 GAS cyl. - 1/2 GAS cyl.
- 1/8 BRIGGS co. - 1/4 BRIGGS co. - 1/2 BRIGGS co.
- 1/4 SAE
- Other threads: contact us

Fixings

- By fastening clamp (through mounting)

Accessories

- Nut, socket & seal
- Plastic storage case, with protective foam

Services

- Calibration or re-calibration with 6 point certificate, Retractable to a COFRAC or BELAC attached national standard.
- Repair Services

Technical specifications

- Accuracy: $\pm 1\%$ end of scale: Class 1
- Operating temperature: $-40 + 70^{\circ}\text{C}$
- Accidental pressure: 150%
- Range of the scale: 300°
- Available dials: from -200 mbar to + 200 mbar
- Other dials on demand

Options

- Vacuum drying of the manometric element
- Overload vent
- Index needle
- Serialnumber printed on the dial
- Custom dial at the customer's request

Vertical Connection

Ø 100 Gauge, Composite, Dry/Oil-filled/Tight

Construction features

- Connection: vertical side or rear central brass
- Housing in reinforced composite material, blue, red or yellow
- Glass Polymetacrylate
- Glass fixation: by collar
- Manometric element:
 - material: tombac
 - assembly: tin solder
- Zeroing screw accessible from the outside
- Brass amplifier mechanism
- Housing filled with silicone oil for the Oil-filled version
- Overload vent

Fixations

- By mounting bracket (surface mounting)
- By fastening clamp (through mounting)

Accessories

- Nut, socket & seal
- Plastic storage case, with protective foam

Services

- Calibration or re-calibration with 6 point certificate, Retractable to a COFRAC or BELAC attached national standard.
- Repair Services

Technical specifications

- Accuracy:
 - **Industry:** $\pm 1\%$ end of scale: Class 1
 - **Laboratory:** $\pm 1\%$ of reading (Tight version only)
- Operating temperature: $-40 + 70^{\circ}\text{C}$
- Accidental pressure:
 - 200% for scales below 50 bar
 - 150% for scales between 50 and 100 bar
 - 125% for scales over 100 bar
- Range of the scale: 300°
- List of available dials: see attached table

Options

- Silver brazing assembly (for temperatures above 70°C)
- Stainless version (max. Scale 100 bar)
Manometric element and all parts in contact with the fluid in stainless steel 316L
- Absolute Calibration
- Oxygen version
- Vacuum drying of the manometric element
- Filling of the manometer element with buffer fluid: glycerine (Industry type only)
- Zeroing screw equipped with knurled knob
- Maximum indicator system with follower needle (Dry & Tight Industry version only)
- Index needle (Dry & Tight version only)
- Overload stop
- Serialnumber printed on the dial
- Custom dial at the customer's request

Dynamometer, Compression & Traction

Construction features

- Hydraulic hose connection: vertical or rear
- Light alloy case, hammered gray epoxy coating
- Glass in Polymetacrylate
- Manometric element:
 - material: tombac
 - assembly: tin solder
- Zeroing screw accessible from the outside
- Brass amplifier mechanism
- Anodized aluminum or nickel-plated steel sensor.
- Hydraulic sensor connection: mini hydraulic hose Ø 6
- Filling fluid: silicone oil
- Diameter of the dial of gauge:
 - 60 mm
 - 100 mm
 - 150 mm
- The case of the gauge can be on request in the three dimensions mentioned either in version «Dry» or «Tight»
- Standard hydraulic hose length: 1m

Accessories

- Plastic storage case, with protective foam

Services

- Calibration or re-calibration with 6 point certificate, Retractable to a COFRAC or BELAC attached national standard.
- Repair Services

Technical specifications

- Accuracy: $\pm 1\%$ end of scale range (Class 1)
- Range of scale: 300°
- Accidental overload:
 - 125% for scales above 2500 daN
 - 150% for scales less than 2500 daN

Range of dials:

- **Compression:**
 - 100 to 250 daN Sensor Ø 60
 - 500 to 1500 daN Sensor Ø 75
 - 2000 to 5000 daN Sensor Ø 89
 - 10000 daN Sensor Ø 119
- **Traction:**
 - 100 to 250 daN Sensor Ø 69
 - 500 to 1500 daN Sensor Ø 89
 - 2000 to 5000 daN Sensor Ø 119
 - 10000 daN Sensor Ø 128

Options

- Max indicator system by follower needle
- Index needle
- Hydraulic hose length on demand
- Direct socket (reader assembled directly on the sensor)
- Units of measurement in daN or kgF
- Serialnumber printed on the dial
- Custom dial at the customer's request
